Alaa Aldeen Ali

Go to Portfolio →

BRIEF BIO

With 8 years of experience, I build fast, scalable web applications that help businesses grow. I handle everything from front-end design to secure backend infrastructure, turning complex requirements into smooth user experiences. My work spans fintech dashboards, multilingual platforms, payment integrations, and custom internal tools — delivered with a focus on performance, accessibility, and clean, maintainable code. I partner with startups and growing teams to ship polished, future-ready products across fintech, education, real estate, and e-commerce.

Professional Experience

NOW

Frontend Developer — ODIX Pay Trading, Dubai, United Arab Emirates

2025 MAR

Develop core fintech platforms by building responsive dashboards, intuitive user flows, and high-performance interface components, while integrating backend systems to manage real-time data. Continuously refine layouts, accessibility, and interaction patterns, and uphold security, performance, and quality standards across all features.

2024 DEC – 2024 JUN

Frontend Developer — Tamkin, Dubai, United Arab Emirates

Converted detailed Figma designs into fully responsive interfaces while integrating backend functionality across the platform. Built custom UI components and advanced modules including a synchronized video and audio player for sign-language interpretation. Implemented online card payments and a dynamic multilingual dashboard, improving both usability and accessibility.

2024 MAR – 2023 AUG

Full Stack Developer — EduTesla, Cairo, Egypt

Built digital systems supporting universities and students across Türkiye — responsive interfaces and improved backend workflows that simplified application and enrollment processes and ensured smooth interaction between students, staff, and administrators.

2020 JUL – 2019 JUL

Backend Developer — SideKick Real-Estate, Cairo, Egypt

Built and maintained backend systems and RESTful APIs that enabled smooth communication between platforms. Added new features and optimized existing code for scalability, fixed issues quickly to keep the system stable, and collaborated closely with the frontend team for seamless integration.

2019 JUL – 2018 APR

Full Stack Developer — 249 Media Productions · New Horizon Training Center, Khartoum, Sudan

Earlier full-stack work building and maintaining company websites and internal tools — responsive pages, backend functionality, content updates, and design refinements — helping each brand present a professional, consistent online presence.

Professional Skills

Business / Technical Skills

- Requirements Analysis & Solution Architecture
- Technical Feasibility Assessment
- System Design & Scalability Planning
- API Strategy & Integration Planning
- Process Automation & Optimization
- Data Handling & Information Management
- Security & Compliance Awareness (Fintech-friendly)
- Cross-Platform Development Understanding
- Agile / Scrum Development Practices
- Product Feature Planning & Technical Prioritization

Lingual Skills Native Arabic, and Fluent English Speaker

Technical Skills

CORE WEB TECHNOLOGIES

HTML5 · CSS3 · JavaScript (ES6+) · TypeScript · SCSS / Sass
